

Hooded Vulture

Neophron monachus

571 plots from 1,547 records

The most widespread vulture and the only species that has adapted to human habitation.

However it is curiously absent from many cities, even Mwanza on the shores of Lake Victoria despite it being a common city bird in Uganda.

Do Ugandan birds not move ?

Virgin Yellow-vented Bulbul squares **35**

Single YvB month **37**

Two YvB months **35**
