

# Ashy Starling

*Cosmopsarus unicolor*

527 plots from 2,249 records

At the scale of the Atlas square the range of this species is now quite well understood. The task now is to fill in the knowledge gaps at the edge of the range and to greatly increase the number of geo-referenced records and breeding season records. The former is easy (do not forget to include altitude) but the latter requires time to observe activity at nest holes and this is far from easy.

Virgin Yellow-vented Bulbul squares **12**

Single YvB month **23**

Two YvB months **22**

	Seasonality
