

57 plots from 60 records tells its own story. This is one of the most difficult birds to find and see, virtually impossible to get good views of. Many records will be from birds hitting windows while migrating at night.

Can this bird be in trouble from habitat loss ? and increasingly from the increase in electric light ?

Blue Quail

Coturnix adansonii

57 plots from 60 records

- Virgin Yellow-vented Bulbul squares 12
- Single YvB month 21
- Two YvB months 24
