

This map puts the recent record from Mufindi (large red dot) in perspective. The record from Rubondo is Neil's from Jan 95, 3 birds on one of the tiny rock islets. It's likely that no one has looked since ! The solitary breeding record is from the Malagarasi at Uvinza in October 93, Neil swam out to check on a sitting bird. The 3 records from 3707C are from the Rufiji River near Kilombero Sugar, Cindy Coster in 2003 and 2005. The single record from the interior of the Selous is from Neil Stronach in Sept 92. The single record from the Ruvuma is from Nov 1936, a long time ago. This recent obs of a juv in Mufindi fits in with the only two breeding season records but, where was it from and where was it going ? we will never know.
