Status

- Presence
- Breeding season
- Month with eggs

records from the East Usambara and (at least) lowland West Usambara refer to *mombassica*. Britton 1980 gives *mombassica* south to Dar-es Salaam but Pugu Hills birds are closer to *suahelica* ????.

Britton 1980 gives *mombassica* (red circles), *suahelica* blue circles, *smithii* red squares and *kavirondensis* blue squares.

but this does not quite fit on biogeographical terms !!!
