

Britton (1980) gives the race *C. n. massaica* for all N central and NE birds and considers those from the Ufipa and Southern Highlands as nominate. No mention is made of birds from western (Mahale area) and the NW. BoA places the latter under *massaica* and Mahale birds under nominate. That single coastal zone record will be an error.

Yellow Warbler

Chloropeta natalensis

188 plots from 572 records

Virgin Yellow-vented Bulbul squares **13**

Single YvB month **25**

Two YvB months **28**
