Surely this bird reaches the Masai Mara. We need clarification from Kenyan birders on the status of any red-billed hornbills west of the Rift Valley. The latest Kenya Atlas map would be useful.

GIS records are required from all squares marked with a GREEN circle. Do not forget to include altitude with the record, this will help define the ecological limits of this endemic.

This is the WHITE_EYED species with the BLACK eye mask. Thanks Sue, we all owe you for this one.
