These records from near Singida at the southern edge of the Mbulu Highlands represent the south-western limits of the species.

The 1st record we have west of the Rift is from the NCA Gols by John Beesley in Jan 1981. Peter Roberts, a visiting bird tour leader had one near Seronera in Mar 98 and then Thomas Gottchalk had them throughout his stay in the Serengeti in 1999. Since then there have been numerous records west of the Rift Valley.
